

**(RESPONSE MUST BE APPROPRIATELY CLASSIFIED AND MARKED SIMILAR TO MARKINGS SHOWN  
BELOW)**

Source Selection Information - See FAR 2.101 and 3.104  
COMPETITION SENSITIVE - PRE-DECISIONAL

**FORMAT FOR TECHNICAL READINESS LEVEL SELF ASSESSMENT**

- 1.0. The offeror shall organize his TRL self assessment using his proposed Product Structure to identify the subsystems for TRL assessment. The same Subsystem Item Entry, Product Structure Number and Nomenclature will be used to identify the subsystem being assessed and contain the following information.
- 2.0. Rationale for TRL self assessment in narrative form. Substantiating data such as test reports, Independent TRL Reviews, etc shall be provided to underpin and add credibility to the assessment.
- 3.0. If the offeror proposes to modify a subsystem assessed at TRL 6 or greater, he shall describe in narrative form the details of what design changes/modifications are required for his proposed GCV integration. This description shall include a short plan outlining the activities required to design/develop and implement the changes required to the existing subsystem to meet the proposed GCV integration. As a part of the narrative, each major step of the plan shall be briefly described with closure criteria for each step. The plan shall be traceable to the details in the proposed IMP/IMS and show when the modified subsystem design changes are completed and the subsystem technology is ready for GCV systems integration.
